PROFESSIONAL SUMMARY

Full stack Software Developer with 3+ years of experience building high traffic production platforms and research tools. Helped launch a Quebec real estate marketplace in five months that now serves approximately 30,000 registered users and 40,000 monthly visitors and has helped users save more than \$23 million. Strong background in C#, ASP.NET Core, Angular, TypeScript, SQL Server, Azure, REST APIs, software architecture, payments, automated testing, and CI/CD, with a record of end to end ownership, deep production troubleshooting, and cross functional technical leadership.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Java, C++, SQL

Frameworks & APIs: Angular, ASP.NET Core, React, Entity Framework Core, LINQ, REST APIs

Architecture & Data: Layered architecture, UML, API design, SQL Server, PostgreSQL, Azure SQL Managed Instance

Cloud & DevOps: Azure, AWS, Docker, Azure Pipelines, CI/CD, Git

Generative AI: Claude, Claude Code

Testing & Platforms: xUnit, JUnit, Selenium, Auth0, Jira, Mapbox, CometChat, Nuvei, Azure Blob Storage

PROFESSIONAL EXPERIENCE

Full Stack Developer

October 2024 to Present

Ubee

Quebec, QC

- Joined as the third engineer with a nearly nonexistent codebase and helped launch the Quebec marketplace in five months using Angular, TypeScript, C#, ASP.NET Core, SQL Server, and Azure; the platform now serves approximately 30,000 registered users and 40,000 monthly visitors and has helped users save more than \$23 million
- Led four cross functional epics from requirements and UML design through production, including a three developer Signature Package delivered in one month and a two developer Purchase Leads release delivered in three weeks, creating new revenue workflows
- Built and owned search, chat, advertising, and lead workflows used by 2,300+ chat users across 3,100+ conversations, 2,500 saved searches, and 550 ad campaigns
- Reduced quote delivery from 24 hours to real time and ranked 70+ quotes into a customer focused top 10
- Optimized a quote expiration workflow from 30 second timeouts to under 50 ms average through batched updates, query optimization, lock analysis, and SQL Managed Instance configuration
- Implemented and maintained Nuvei payment flows supporting approximately 2,000 transactions; shipped a user facing hotfix within one hour for an undocumented 3DS failure and delivered a permanent fallback after coordinating with provider support
- Completed 300+ Jira issues across feature delivery, production support, and technical debt; wrote at least 250 of the platform's 1,000+ unit tests and resolved 80+ bug tickets, with most production fixes completed in under two hours
- Raised team effectiveness by reviewing code across teams of up to seven developers, onboarding one developer and one QA analyst, mentoring React Native developers on shared APIs, and creating five architecture documents, three diagrams, and two onboarding videos

Research Assistant, Part time

May 2023 to March 2026

Department of Linguistics, University of Ottawa

Ottawa, ON

- Served as the sole software engineer on a six person interdisciplinary team and delivered Python and C# tools used by four linguists multiple times each week
- Built a Python desktop GUI that merged approximately 19,000 entries from two dictionaries into 14,000 to 15,000 deduplicated records, reducing manual reconciliation by approximately 95%
- Automated digitization of a 600 page dictionary and built a custom web application that has enabled researchers to translate 100+ Cham texts and supported work for a paper currently in peer review

PROFESSIONAL EXPERIENCE, CONTINUED

Full Stack Developer

May 2022 to August 2022

Conceptio Technologies

Quebec, QC

- Delivered an internal task automation web application in 12 weeks as part of a three person team, building four screens, 20 Web API endpoints, and five data entities using Angular, TypeScript, C#, ASP.NET, and Auth0
- Wrote 100 xUnit tests and maintained more than 80% backend code coverage
- Implemented two role access control, and standardized UTC timestamps for reliable timezone handling

Web Developer

September 2021 to December 2021

EUC Service Evolution, Innovapost

Ottawa, ON

- Built an accessible SharePoint Online self service portal for 500+ employees and modernized more than 20 support articles across approximately eight legacy front end templates
- Added Google Analytics to ground content decisions in usage data and presented the portal MVP and findings to EUC team leadership

PROJECTS

Researcher Discovery Platform, Capstone Project

January 2023 to December 2023

University of Ottawa

Ottawa, ON

- Selected the technology stack and built an Angular, C#, SQL Server, and LINQ discovery platform in a five person team, integrating UniWeb, Scopus, and research grant data across thousands of academic records
- Developed weekly Azure Synapse pipelines and collaborated with DataHub stakeholders to expand data coverage and improve query performance for Boolean researcher searches

Personal Portfolio Website

React, TypeScript, GitHub Pages

karimbenhallam.com | [GitHub](#)

- Designed and developed a personal portfolio showcasing professional experience, technical skills, and selected software projects
- Built interactive browser based experiences, including a playable Snake game and a Ballon d'Or winners application, within a React and TypeScript interface
- Configured deployment through GitHub Pages with a custom domain and HTTPS

EDUCATION

Bachelor of Applied Science, Software Engineering

September 2019 to May 2024

University of Ottawa

Ottawa, ON

LANGUAGES

English, Fluent | French, Fluent
